

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. TREASURY DEPARTMENT,  
May 1, 1879.

SIR: I have the honor to transmit to the House of Representatives a statistical abstract, prepared under my direction by the Chief of the Bureau of Statistics.

This abstract embraces tables in regard to finance, coinage, commerce, immigration, tonnage and navigation, the postal service, public lands, railroads, agriculture, and mining.

Very respectfully, yours,

JOHN SHERMAN,  
Secretary.

HON. SAMUEL J. RANDALL,  
Speaker House of Representatives.

1. The production of sugar and molasses in Louisiana is stated upon the authority of M. r for the period prior to 1861, and for the later years upon the authority of M. Louis . These authorities give both the number of hogsheads and the number of pounds for each the exception of the year 1861-'62, for which year only the number of hogsheads is given. r of pounds of sugar produced during that year has, however, been computed by estimating of the hogshead at 1,150 pounds.

—The consumption of tea and of coffee in the United States for each year, from 1830 to 1866, is estimated by subtracting the amount exported from the amount imported. For the years 1878, inclusive, the amounts of the respective articles entered for consumption at the customs taken as the consumption. The population is estimated for years other than the census years, 1840, 1850, 1860, and 1870.

<sup>a</sup> In the column of "Production," the amount set opposite the fiscal year is the product of the preceding calendar year. This is done in order that the year in which the rails are mainly produced and consumed, may correspond with the import and export year.

N. B.—The production of pig-iron and of iron and steel railroad bars, in the above tables, is computed by Mr. James M. Swank, Secretary of the American Iron and Steel Association.

a The natives of Ireland are partly estimated on the basis of data obtained by the Commissioners of Emigration of New York, who have made careful inquiries on this subject. The total from the British Isles, given above, is from official returns to the Bureau of Statistics.

NOTE.—It is estimated that the number of alien passengers arrived in the United States from 1793 to 1820 amounted to 250,000.

128.—NUMBER and NATIONALITY of IMMIGRANTS ARRIVED  
the UNITED STATES during the EIGHT CALENDAR YEARS, from  
71 to 1878, inclusive.

a Prior to the year 1864 the tonnage of British Columbia is combined with that of the British Possessions on the Atlantic; subsequent to that period they are shown in a separate column.

b A small portion of the tonnage from the United Kingdom during these years entered at lake ports and has been deducted from the total tonnage entered from that country, which will account for the apparent discrepancy between these figures and those of the regular annual statements of navigation.

c No detailed statement of the trade of each port with foreign countries was published for these years, which renders it impossible to determine what amount of the tonnage of any foreign country may have entered at lake ports. The whole amount of tonnage from the countries heretofore enumerated has therefore been credited to seaports.

a No detailed statement of the trade of each port with foreign countries was published for three years, which renders it impossible to determine what amount of the tonnage of any foreign country may have entered at lake ports. The whole amount of tonnage from the countries herein enumerated has therefore been credited to seaports.

NOTE 1.—The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific Railway bonds.

NOTE 2.—The statement of population for 1860 and 1870 is by enumeration, and for other years from estimates prepared by Mr. E. B. Elliott, of this department.

NOTE 3.—The figures for July 1, 1879, are made up assuming pending funding operations to have been completed. A slight revision of them may be necessary hereafter.

NOTE 4.—The temporary loan, per act of July 11, 1862, is included in the 4 per cent, from 1862 to 1868, inclusive, with the exception of the amount outstanding for August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent. to 6 per cent., and was redeemable on ten-days' notice after thirty days, but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent. interest on an average for the year.

<sup>a</sup> In the columns of "Production," the amount placed opposite the fiscal year is the production of the preceding calendar year, since the exports and consumption of cotton during the fiscal year are mainly of the production of the preceding calendar year.

<sup>b</sup> No record during the war period.

*a* In the column of "Production," the amount placed opposite the fiscal year is the production of the preceding calendar year. For example: The quantity stated in the column of "Production" opposite the year 1878 is the production of the calendar year 1877, since the exports of wheat and of corn, during the year 1878, were principally of the respective crops of the calendar year 1877.

The production of both wheat and corn during the year 1869 is taken from the census report of the succeeding year. The production for the other years is taken from the annual reports of the *Statistician of the Department of Agriculture*.

a No data.

NOTE.—The production of sugar and molasses in Louisiana is stated upon the authority of M. Champonier for the period prior to 1861, and for the later years upon the authority of M. Louis Bouchereau. These authorities give both the number of hogsheads and the number of pounds for each year, with the exception of the year 1861-'62, for which year only the number of hogsheads is given. The number of pounds of sugar produced during that year has, however, been computed by estimating the weight of the hogshead at 1,150 pounds.

<sup>a</sup> Prior to the year 1864 the tonnage of British Columbia is combined with that of the British Possessions on the Atlantic; subsequent to that period they are shown in a separate column.

<sup>b</sup> A small portion of the tonnage from the United Kingdom during these years entered at lake ports, and has been deducted from the total tonnage entered from that country, which will account for the apparent discrepancy between these figures and those of the regular annual statements of navigation.

<sup>c</sup> No detailed statement of the trade of each port with foreign countries was published for these years, which renders it impossible to determine what amount of the tonnage of each foreign country, if any, may have entered at lake ports. The whole amount of tonnage from the countries herein enumerated has therefore been credited to seaports.

a No detailed statement of the trade of each port with foreign countries was published for these years, which renders it impossible to determine what amount of the tonnage of each foreign country, if any, may have entered at lake ports. The whole amount of tonnage from the countries herein enumerated has therefore been credited to seaports.

a This statement is the result of original estimates, made by Mr. J. R. Dodge, from annual returns to the Department of Agriculture, of the comparative condition and area of the crop and price of product; and as to quantity of production, mainly from the official records of manufacture and exportation. It has been demonstrated that returns of production of tobacco, which bears a heavy tax, are uniformly under-estimates, whether census returns or those of the Department of Agriculture; a fact in accord with the experience of all governments with respect to voluntary statistical returns of taxed products. The prices are the average home or farm value of leaf tobacco.

a The statistics for 1869 are derived from the United States Census. The statistics for 1876, 1877, 1878, and 1879 are compiled from data collected and estimates made by Mr. Frederick E. Saward, editor of the Coal Trade Journal of New York.

b Includes 3,000,000 tons estimated as the local consumption. The amount given as the production of anthracite coal for 1879 does not include this estimate, but represents the actual shipments to market.

a This statement is the result of original estimates, made by Mr. J. R. Dodge, from annual returns to the Department of Agriculture, of the comparative condition and area of the crop and price of product; and as to quantity of production, mainly from the official records of manufacture and exportation. It has been demonstrated that returns of production of tobacco, which bears a heavy tax, are uniformly under-estimated, whether census returns or those of the Department of Agriculture: a fact in accord with the experience of all governments with respect to voluntary statistical returns of taxed products. The prices are the average home or farm value of leaf tobacco.

a The statistics for 1869 are derived from the United States Census. The statistics for 1876, 1877, 1878, and 1879 are compiled from data collected and estimates made by Mr. Frederick E. Saward, editor of the Coal Trade Journal of New York.

b Includes 3,000,000 tons estimated as the local consumption. The amount given as the production of anthracite coal for 1879 does not include this estimate, but represents the actual shipments to market.

NOTE 1.—The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific Railway bonds.

NOTE 2.—The statement of population for 1860, 1870, and 1880, is by enumeration, and for other years from estimates prepared by Mr. E. B. Elliott, of this department.

NOTE 3.—The figures for July 1, 1870, were made up, assuming pending funding operations to have been completed.

NOTE 4.—The temporary loan per cent of July 11, 1862, is included in the 4 per cent. from 1862 to 1868, inclusive, with the exception of the amount outstanding for August 31, 1865, the date when the interest on this loan was reduced to 6 per cent. This loan bore interest from 4 per cent. to 6 per cent. Interest on an average for the year, but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent. interest on an average for the year.

NOTE 1.—The amount of State and national bank circulation is compiled from the reports of the Comptroller of the Currency at the nearest dates obtainable to the end of each fiscal year; the other amounts are taken from the official printed reports of the Secretary of the Treasury.

NOTE 2.—Exclusive of \$6,375,084, amount estimated as lost or destroyed, act June 21, 1876.

NOTE 3.—The coin and two year notes of 1862 and the compound-interest notes, though having a legal-tender quality for their face values, were in fact interest-bearing securities, payable at certain times, as stated on the notes. They entered into circulation for but a few days, if at all, and, since maturity, those presented have been converted into other interest-bearing bonds, or paid for in cash, interest included.

NOTE 4.—The amount of fractional silver in circulation in 1860, 1861, and 1862 cannot be stated. The amounts stated for 1876, 1877, 1878, and 1879 are the amounts coined and issued since January 1, 1876. To these amounts should be added the amount of silver previously coined which has come into circulation.

No. 14.—AMOUNT OF RESOURCES AND LIABILITIES OF THE NATIONAL BANKS IN OPERATION AT THE DATES  
named, from 1872 to 1880, inclusive (expressed in millions of dollars).

<sup>a</sup> In the column of "Production," the amount placed opposite the fiscal year is the production of the preceding calendar year. For example: The quantity stated in the column of "Production" opposite the year 1880 is the production of the calendar year 1879, since the exports of wheat and of corn, during the year 1880, were principally of the respective crops of the calendar year 1879.

The production of both wheat and corn during the year 1869 is taken from the census report of the succeeding year. The production for the other years is taken from the annual reports of the Department of Agriculture.

NOTE.—The production of sugar and molasses in Louisiana is stated upon the authority of M. Champoiner for the period prior to 1861, and for the later years upon the authority of M. Louis Bouchereau. These authorities give both the number of hogsheads and the number of pounds for each year, with the exception of the year 1861-'62, for which year only the number of hogsheads is given. The number of pounds of sugar produced during that year has, however, been computed by estimating the weight of the hogshead at 1,150 pounds.

<sup>a</sup> In the column of "Production," the amount placed opposite the fiscal year is the production of the preceding calendar year. For example: The quantity stated in the column of "Production" opposite the year 1880 is the production of the calendar year 1879, since the exports of wheat and of corn, during the year 1880, were principally of the respective crops of the calendar year 1879.

The production of both wheat and corn during the year 1889 is taken from the census report of the succeeding year. The production for the other years is taken from the annual reports of the Department of Agriculture.

NOTE.—The production of sugar and molasses in Louisiana is stated upon the authority of M. Champoiner for the period prior to 1861, and for the later years upon the authority of M. Louis Bouchereau. These authorities give both the number of hogsheads and the number of pounds for each year, with the exception of the year 1861-'62, for which year only the number of hogsheads is given. The number of pounds of sugar produced during that year has, however, been computed by estimating the weight of the hogshead at 1,150 pounds.

<sup>a</sup> Prior to the year 1864 the tonnage of British Columbia is combined with that of the British Possessions on the Atlantic; subsequent to that period they are shown in a separate column.

<sup>b</sup> A small portion of the tonnage from the United Kingdom during these years entered at lake ports, and has been deducted from the total tonnage entered from that country, which will account for the apparent discrepancy between these figures and those of the regular annual statements of navigation.

<sup>c</sup> No detailed statement of the trade of each port with foreign countries is published, and it is therefore impossible to determine what amount of the tonnage of each foreign country, if any, may have entered at lake ports. The whole amount of tonnage from the countries herein enumerated has therefore been credited to seaports.

a No detailed statement of the trade of each port with foreign countries was published for these years, which renders it impossible to determine what amount of the tonnage of each foreign country, if any, may have entered at lake ports. The whole amount of tonnage from the countries herein enumerated has therefore been credited to seaports.

*a* This statement is the result of original estimates, made by Mr. J. R. Dodge, from annual returns to the Department of Agriculture, of the comparative condition and area of the crop and price of product; and as to quantity of production, mainly from the official records of manufacture and exportation. It has been demonstrated that returns of production of tobacco, which bears a heavy tax, are uniformly underestimates, whether census returns or those of the Department of Agriculture; a fact in accord with the experience of all governments with respect to voluntary statistical returns of taxed products. The prices are the average home or farm value of leaf tobacco.
